Foreign Institutional Investors have pulled out Rs 1,98,103 crore from Indian equities in 2025. September alone saw Rs 27,163 crore exit. This selling trend has continued for nearly two years, totaling Rs 3,19,313 crore over 21 months. Analysts point to valuation concerns and global allocation shifts. Outflows may slow as valuations stabilize and corporate earnings improve.

Detailed analysis:

Sustained FII outflows pressure market sentiment and can affect currency and liquidity. Examine the drivers – global risk-off, valuation gaps, and domestic policy – as they are frequent topics in economics and finance papers.

Summary:

Born at the stroke of noon on October 4, the female calf is Kuwari's second offspring

Detailed analysis:

The birth of a new elephant calf in Kaziranga National Park highlights the success of wildlife conservation programmes in India. For UPSC and other government exams, this article can be used to illustrate topics such as biodiversity preservation, the role of protected areas, human-wildlife coexistence, and the cultural significance of wildlife in India. The naming after a popular Assamese singer underscores community involvement in conservation, a point often asked in questions on public participation and awareness campaigns. The species (Asian elephant) is listed as endangered, making this event relevant for discussions on the IUCN Red List, habitat protection, and anti-poaching measures. Students should note the location (Kaziranga, Assam), the mother's name (Kuwari), and the newborn's name (Mayabini) for possible factual recall.
