IMF Boosts India's Growth Forecast – Economy Set to Surge Past 6%!

Image 1 (Real):

Image 2 (Pexels):

Summary:

The International Monetary Fund (IMF) has revised India's GDP growth forecast for the current fiscal year upward to 6.6 per cent, up from its earlier estimate of 6.4 per cent, citing strong economic momentum that has helped offset the impact of US tariffs on Indian exports.

Detailed analysis:

A higher IMF forecast signals confidence in India's macro-economic fundamentals, influencing policy-making, budget estimates and competitive examinations that test knowledge of economic indicators, external sector dynamics and fiscal planning.

Image 2 (Pexels):

Summary:

Experts caution while gold remains the go-to hedge, silver offers better valuation and industrial demand, recommending strategic allocation via ETFs or mutual-fund FoFs.

Detailed analysis:

Silver's 108% price surge this year makes it an attractive tactical play, but its higher volatility calls for a balanced approach with gold for safety. A 70-30 gold-silver split could optimise risk-adjusted returns during the festive period.

Image 2 (Pexels):

Summary:

While simplifying partial withdrawals is welcomed, added restrictions on final settlement may create more problems than they solve, according to experts.

Detailed analysis:

The policy aims to improve liquidity for retirees but may inadvertently discourage long-term savings if the settlement hurdles are too stringent. Workers should evaluate the trade-off between immediate cash needs and preserving retirement corpus.

Act Now or Pay Billions: India's Climate Rescue Plan Reveals Massive Savings!

Image 1 (Real):

Image 2 (Pexels):

Summary:

Early investments in social protection and resilience can slash India's climate-related losses by over 80%, offering a five-fold return on every rupee spent, a study by the International Institute for Environment and Development says.

Detailed analysis:

The study underscores the fiscal prudence of pre-emptive climate action, a key theme in UPSC papers on sustainable development and disaster management. Candidates should note the 80% loss reduction figure and the 5x ROI as quantifiable benefits for policy proposals.

Image 2 (Pexels):

Summary:

A new Wildlife Trust of India report, “Guardians of the Wild,” highlights the courage and sacrifices of Van Rakshaks, the nation’s frontline forest guards. Guarding over 1,100 Protected Areas, these rangers work under dangerous and under-equipped conditions, with India recording the world’s highest number of forest staff fatalities.

Detailed analysis:

The piece draws attention to human-resource challenges in forest conservation—a frequent UPSC topic. Candidates should note the statistic of 1,100 protected areas and the alarming fatality rate among forest staff, reflecting policy gaps in safety and capacity building.

Image 2 (Pexels):

Summary:

As of July 2025 – until which the report tracked progress – the PMSGY had 57.9 lakh applications for residential rooftop solar installations.

Detailed analysis:

The data highlights the gap between policy ambition and ground-level execution. Important for exams: understand the scale of applications (57.9 lakh) versus actual installations, and the systemic issues—financing, permits, grid integration—that impede target achievement.
