Image 2 (Pexels):

Summary:

India's economy faces a slowdown to 6.3% in fiscal 2027. Higher energy costs from the Middle East conflict will impact investment and exports. Despite this, India remains a top global growth engine. Private consumption and investment are expected to moderate. Inflation will rise before easing. Global growth also slows.

Detailed analysis:

Understanding external shocks (energy prices, geopolitics) and their transmission to GDP is crucial. The forecast underlines the need to monitor fiscal and monetary policy responses for UPSC/SSC economics questions.

Rate freeze! RBI stalls interest cuts as geopolitical storm brews

Image 1 (Real):

 Original Image

Image 2 (Pexels):

Summary:

The Reserve Bank of India is expected to hold interest rates steady on Friday, according to Bank of Baroda. The central bank will likely maintain a data-dependent approach, balancing growth concerns with rising inflation risks. An upward revision in inflation forecasts is anticipated due to increased fuel prices and ongoing global uncertainties.

Detailed analysis:

A steady repo rate signals RBI's priority on price stability over growth acceleration. Examine how external fuel price pressures feed into inflation expectations and why a cautious stance is taken during geopolitical uncertainty.
