Nilgiris Under Siege: Real-Estate Frenzy Threatens Hill Ecosystems!

Image 1 (Real):

 Original Image

Image 2 (Pexels):

Summary:

The Nilgiris is under attack. Climate change and falling tea prices have heralded a transformation in the hills that does not augur well for its fragile ecosystem. The rapid real estate expansion on erstwhile tea estates in the Blue Mountains is placing additional pressure on the hills, creating demands for new infrastructure and dramatically altering the landscape, setting alarm bells ringing, says Rohan Premkumar.

Detailed analysis:

The piece examines the intersection of climate change, economic pressures, and unplanned urbanisation in the Nilgiris—a UNESCO World Heritage landscape. It underscores habitat fragmentation, water stress, and loss of endemic flora/fauna, topics frequently asked in the Ecology & Biodiversity segment of competitive exams.
