**Summary:**

The film is a stunning deep dive into the life of turtle conservationist Satish Bhaskar, who walked nearly every inch of India's coastline to discover the nesting beaches of sea turtles so that they could be protected.

**Detailed analysis:**

For UPSC and state-level environment papers, note Bhaskar's grassroots mapping of nesting sites, the role of community-based monitoring, and how documentary media can influence policy. The case illustrates the integration of biodiversity conservation with coastal management, a recurring topic in the Ecology & Environment syllabus.

*El Niño Unleashes a Fury: Kerala's Forests Face a Fire-Storm Apocalypse!*

**Image 1 (Real):**

Original Image

**Image 2 (Pexels):**

**Summary:**

According to the Forest Survey of India, Kerala reported 49 large forest fire incidents so far this year, compared with 52 in 2025. The amount and distribution of northeast monsoon rainfall will be crucial in determining water availability in forests and the extent of water stress on wildlife.

**Detailed analysis:**

Exam candidates should link El Niño's anomalous warming to reduced monsoon precipitation, increased fire risk, and habitat loss. Emphasize the need for climate-resilient forest management, early-warning systems, and integrated water-resource planning—key points for climate change and disaster management sections of the exam.
