Summary:

China has requested the WTO's dispute settlement body to establish a panel to examine its case against India's incentive schemes for auto, battery, and electric vehicles. Bilateral consultations failed to resolve the dispute, with China alleging the schemes violate global trade rules by discriminating against its goods.

Detailed analysis:

The dispute illustrates the intersection of trade policy, environmental incentives, and international law—areas frequently tested in the General Studies papers. Aspirants should grasp the WTO's role, the concept of 'subsidy-related' disputes, and their implications for India's export-oriented industries.

Summary:

Saudi Arabia is transferring some Vision 2030 project scopes to the private sector to avoid economic overheating and manage timelines. The government is being agile, rescoping projects while maintaining momentum on its economic transformation goals. The kingdom is over halfway through its ambitious plan, with the non-oil economy now exceeding 55% of GDP.

Detailed analysis:

The shift to private-sector-led execution reflects a broader global trend of diversifying economies away from hydrocarbons. For Indian exam candidates, comparing Saudi's model with India's own 'Make in India' and 'AatmaNirbhar' initiatives can provide valuable comparative analysis for essay and case-study questions.
