Summary:

An ARIA analysis shows that trading-call providers—both registered and unregistered—accounted for nearly 97% of Sebi's enforcement orders under the Investment Advisers framework since 2013. Of 218 orders issued until March 2025, only six involved registered investment advisers, none of which led to investor losses.

Detailed analysis:

Regulatory vigilance over unregistered advisory services is a recurring UPSC and banking exam focus. The data highlights the effectiveness of SEBI's investor-protection regime and the low incidence of misconduct among licensed advisers, reinforcing the importance of compliance certifications.

Gold Rockets Rs 8,200 in Ten Days – Is a 1.55 Lakh Rupee Spike Around the Corner?

Image 1 (Real):

 Original Image

Image 2 (Pexels):

Summary:

Indian gold prices have seen a significant jump, nearing Rs 1,26,000 per 10 grams. This rise is driven by positive global sentiment regarding the US government shutdown resolution and expectations of US Federal Reserve interest rate cuts. Strong domestic demand from the wedding and festive season further supports this upward trend.

Detailed analysis:

Commodity price volatility, especially gold, is frequently tested in economics papers. The article ties international monetary policy (Fed rate cuts) and domestic demand cycles to price movements, illustrating the interplay of macro-factors that aspirants should link to inflation and wealth-preservation strategies.
