Image 2 (Pexels):

Summary:

Climate change represents a profound injustice. Those least responsible for emissions—farmers, coastal and indigenous peoples, informal workers, and youth in the Global South—bear the heaviest psychological and material burdens. Recognising mental health as core climate infrastructure is not a luxury but a necessity

Detailed analysis:

This article links climate change to public-health policy, a topic frequently asked in UPSC Environment and Ecology papers. It highlights vulnerable groups, the concept of "climate-induced mental health" and the need to treat mental health as climate infrastructure, useful for answer framing on climate justice and health impacts.
