Summary:

The recent proposals in the Income Tax Rules enhance education and college hostel allowances and reclassify cities for HRA purposes. These changes may entice salaried individuals to reconsider the old tax regime, especially in high-rent urban areas.

Detailed analysis:

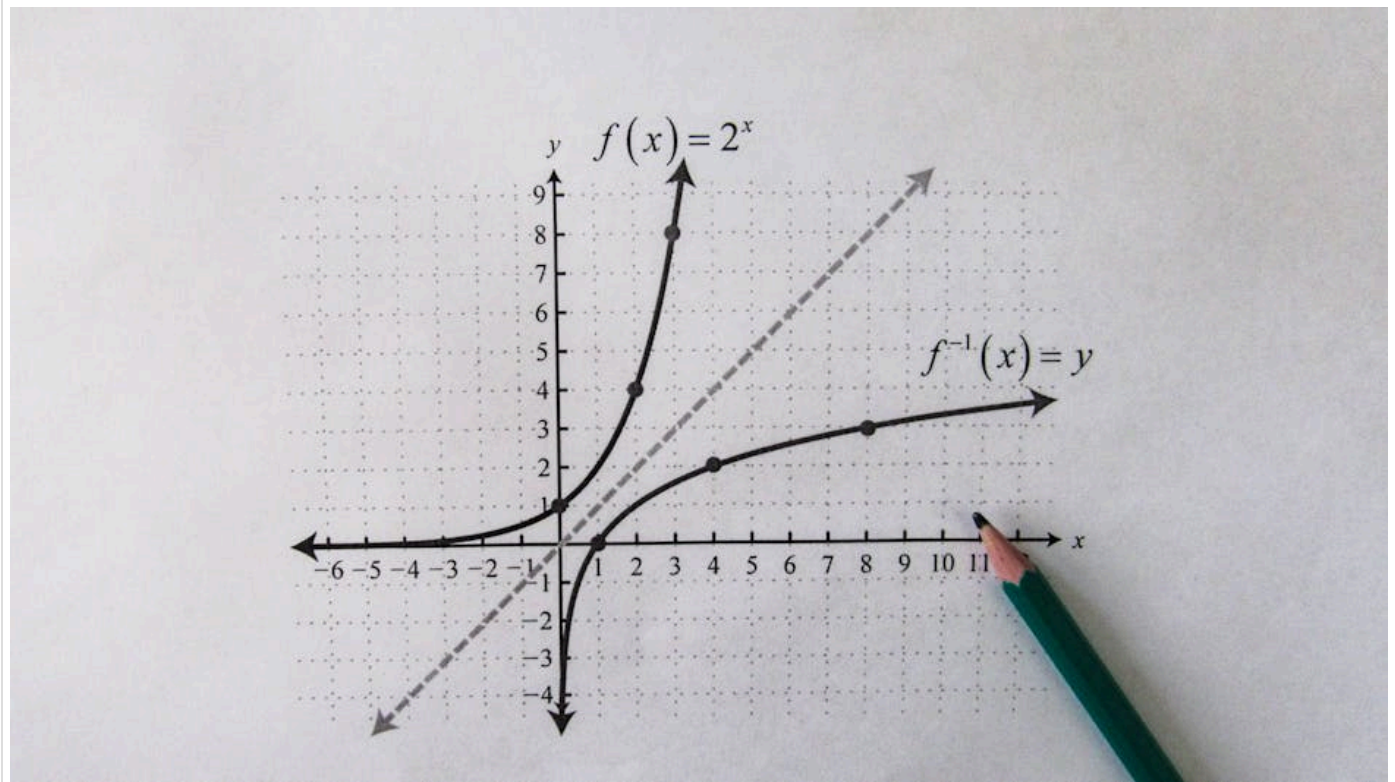

Understanding the shift in tax incentives—especially HRA, education, and hostel allowances—helps answer finance-related questions in exams. Candidates should compare old vs. new regimes, noting who benefits most under the revised rules.

Summary:

The hair-crested drongo, a bird species previously unrecorded in Tamil Nadu, was observed in Madurai, marking a significant range expansion and highlighting habitat changes.

Detailed analysis:

This first-record sighting underscores the importance of monitoring avian distribution shifts due to urbanisation and climate change. Aspirants should note how habitat alteration can lead to new species records, a frequent topic in ecology sections of UPSC and state exams.

Summary:

Research indicates that lion-tailed macaque populations are increasing in areas heavily altered by human activities, challenging conventional views on wildlife-human conflict.

Detailed analysis:

The findings illustrate adaptive behaviour of primates in anthropogenic habitats, a key concept for environmental governance and wildlife management questions in competitive exams. It also stresses the need for integrated conservation policies that consider human-wildlife coexistence.
