Gold Soars Past \$4,350! Is a Boom or a Bubble Looming?

Image 1 (Real):

 Original Image

Image 2 (Pexels):

Summary:

Spot gold in the London market breached \$4,350 an ounce this week, marking a historic high. In India, prices have surged past ₹1,31,000 per 10 grams, in MCX, just ahead of the festive season.

Detailed analysis:

The record-high gold price signals strong global inflationary pressures and a weakening US dollar, which can boost gold as a safe-haven asset. For Indian investors, higher gold prices raise the cost of jewellery demand during festivals, potentially widening the trade deficit. Exam takers should note the link between commodity price spikes and balance-of-payments, as well as the RBI's possible policy response to curb inflationary spill-overs.
