Image 2 (Pexels):

Summary:

The larvae of the *Phalera cf. bucephala*, commonly called the buff-tip moth, are voracious feeders, capable of stripping an entire tree bare in a few weeks

Detailed analysis:

The buff-tip moth could decimate Ladakh's limited agro-forestry, jeopardising livelihoods and increasing soil erosion in a fragile high-altitude ecosystem. Early detection, biological control and community awareness are crucial for preventing a cascade of ecological and economic losses—a key case study for exam questions on invasive species management.

Image 2 (Pexels):

Summary:

During PADI's Go Eco Month in April, last month, divers across India's reef fringed islands and mainland coasts paired exploration with clean ups, reef and cove awareness, and a growing ethic of responsible travel. In coastal hubs like Goa and the Andamans, a new wave of divers is combining holidays with marine clean-ups, reef education, and responsible tourism.

Detailed analysis:

This initiative showcases community-driven marine stewardship, linking tourism with ecosystem health. For UPSC aspirants, it illustrates how non-governmental actors can complement policy by reducing plastic pollution, protecting coral reefs, and fostering a conservation mindset among youth.

Summary:

As David Attenborough turns 100, his legacy of bringing nature's beauty to millions remains unmatched. However, his choice of aesthetics over politics sustained harmful colonial myths and obscured the violent realities of modern conservation

Detailed analysis:

This critique urges readers to examine the colonial underpinnings of conservation narratives. For exam preparation, it highlights the need to assess environmental policies through a socio-historical lens, recognizing how past power dynamics shape present conservation ethics.
